

WAVES'N SEE

DASHBOARD

A tool to support decision making

The dashboard gives access to our WaveCams® system data through an interactive interface. It allows you to navigate through different time-scales to understand the evolution of your beach through time and storm events.

A tool to communicate

Sedimentary transport through the coastal zone come into a complex and local dynamic. The dashboard gives a look at fast-paced and long term evolutions of a given beach, making development works and coastal protection decisions easier.
